

2013 Exception List: Countries at Low Risk for TB

Foreign-born persons from countries with high TB incidence are among the groups that should be screened for TB and TB infection. The CDC defines high risk countries as those with 20 or more TB cases per 100,000 population. Individuals from countries with less than 20 TB cases per 100,000 should only be tested if they are symptomatic or have an individual risk factor for acquiring TB infection or progressing to TB disease.

2013 Exception Listⁱ					
Test for Latent TB Infection only if Symptomatic or an Additional Individual Risk Factor is Present
